WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 172
PAGE 1

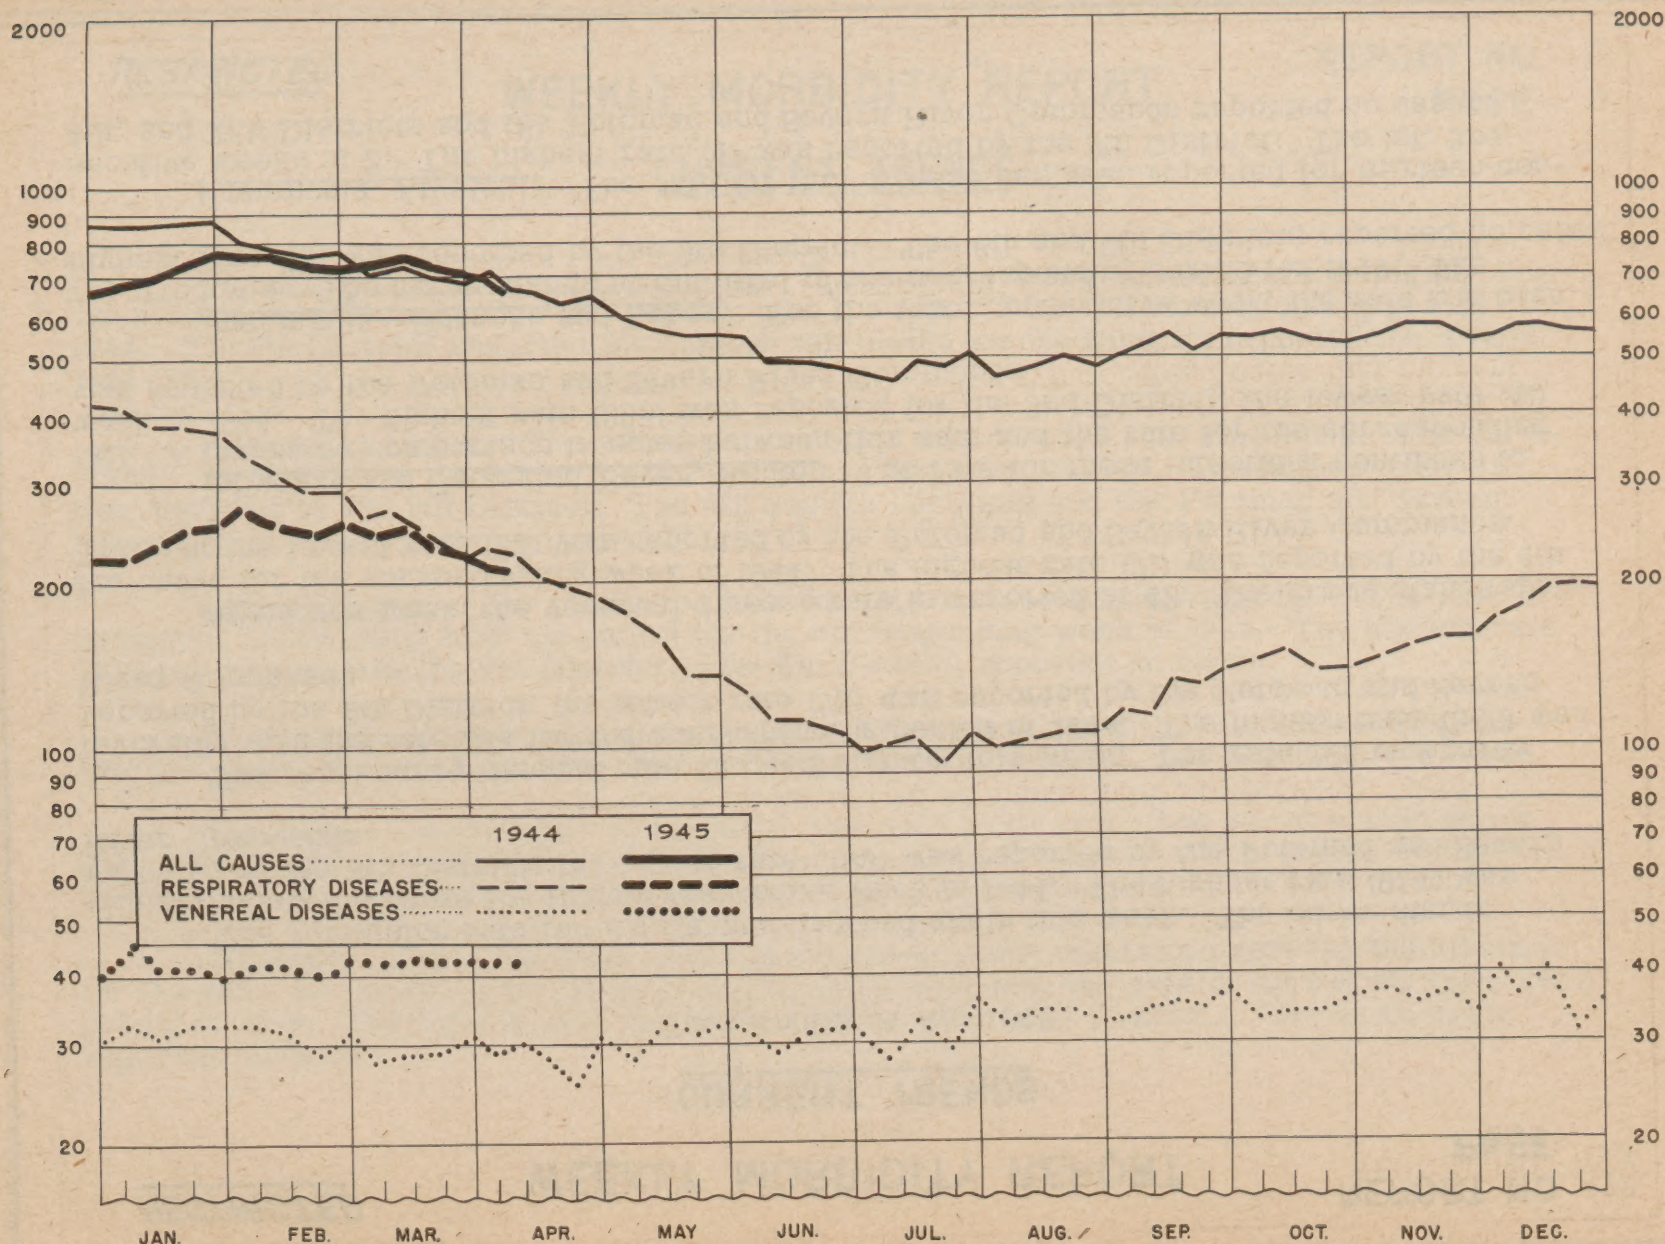

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 14 Apr 1945

The admission rate for All Causes dropped again this week. The curve stands slightly below the curve for the corresponding week of 1944. The highest rate (934) was reported by the 9th District; the lowest rate (399) was reported by the Potomac and Severn River Commands.

The respiratory disease rate dropped slightly this week. The rate 203 compares favorably with the rate 224 for the corresponding period of 1944. The highest rate (368) was reported by the 9th District; the lowest rate (72) was reported by the Potomac and Severn River Commands.

Again this week, the venereal disease rate is reported at 42. The curve stands above the curve for the corresponding week of 1944. The highest rate (71) was reported by the 4th District; the lowest rate (23) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The rate for these infections continues to fall. A favorable comparison is noted between this rate and the rate for the corresponding week of 1944. The highest rate (225) was reported for the 3rd District; the lowest rate (41) was reported by the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. For the third consecutive week, the rate has been reported at 4. The curve stands at the level of the corresponding period for 1944. The highest rate (13) was reported by the 5th District. The 6th and 7th Districts reported no cases.

Pneumonia, Atypical. The rate for this disease has been reported for thirteen consecutive weeks at 2. The highest rate (4) was reported by the 8th District. The 1st, 3rd, 4th, and 13th Districts and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections rose slightly this week. The rate 74 compares unfavorably with the rate 63 for the corresponding period of 1944. The 9th District reported the highest rate (199); the 7th District reported the lowest rate (30).

Rheumatic Fever. The admission rate for this disease rose this week. The curve stands slightly below the curve for the corresponding week of 1944. The highest rate (11) was reported by the 9th District. The 4th and 6th Districts and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The admission rate for this disease continues to fall. The rate 18 compares unfavorably with the rate 9 for the corresponding week of 1944. The highest rate (70) was reported by the 9th District. The 6th District reported no cases.

Cerebrospinal Fever, Meningococcic. After standing at 0.07 for two weeks, the rate this week rose to 0.13. Only four districts, the 5th, 8th, 11th, and 12th reported cases.

Malaria. The rate for this disease rose this week to 3. The curve stands above the curve for the corresponding week of 1944. The highest rate (5) was reported by the 5th District; the lowest rate (0.52) was reported by the 1st District.

Measles. There has been a steady decrease in the admission rate for this disease for the past six weeks. The rate 6 compares favorably with the rate 12 for the corresponding period of 1944. The highest rate (18) was reported by the 3rd District. The 7th District reported no cases.
